AccellosOne Event

Real-time Notification Services

Systematically Managing By Exception

The supply chain industry is made up of events. Businesses buy, sell, ship, and maneuver goods on a daily basis to achieve the operational efficiencies which drive profitability. Traditionally, margin erosion happens through small exceptions in this process that can't be efficiently captured and corrected.

AccellosOne Event provides an easy to use and powerful tool to help capture events and provide relevant information to users to:

- Reduce the time it takes to correct supply chain issues
- Increase responsiveness to customers on important events
- Automate normal business operations to increase the overall efficiency of the enterprise

Event does this by capturing every event that happens within the AccellosOne product portfolio and providing an interface to:

- Efficiently filter through the events to find ones of interest
- Setup multiple pre-defined sets of filters
- Easily create useful notifications via email, text message, or visual desktop notification

Imagine the areas where you can put Event to work for your business. Deliver information vital to the success of your organization where it is needed in real-time with Event!

Call Us Today For More Details

AccellosOne Event can help you lower your costs, improve your customer service and drive operational efficiencies in your business. Isn't it time to start?
