## Directing your Warehouse Efficiency

### The Warehouse as a Differentiator

The Aberdeen Group recently published a study that identified these as the top issues facing today's supply chain executives:

The need to support increased sales without increasing staff or space

Limitations/availability of warehouse space

Increasing demand/supply fluctuations

Today's warehouse managers are consistently finding that 2 to 5% improvement across various performance metrics can mean hundreds of thousands of dollars in bottom-line returns to the business.

With the economy that we find ourselves in, there aren't many places within the organization, short of reducing head count, that a company can find that kind of return. Focusing on technology to complement your business processes can help you manage key performance indicators within the warehouse like:

Order accuracy

Order shipped on time and complete

Minimize inventory carrying costs

Decrease warehouse labor costs

Accellos can help. We've built our Manage solution to provide the out of the box tools and the extensibility to tackle even the most difficult tasks in the warehouse.

### Available Anywhere

AccellosOne Manage's browser-based design makes it simple to use regardless of location. We've made it very familiar and intuitive to learn how to manage:

Order allocations

Simple warehouse transfers

Wave planning

Multiple warehouse zones

Management reporting

Kitting

## AccellosOne Manage Warehouse Edition
