# AccellosOne Screen Designer

## Configuring Handheld Presentation

### Assuring Your Process Success

Every warehouse is different. In a 3rd party warehouse, each client may have specific requirements. Leaving the capture of critical information to chance can spell less than desirable results.

Screen Designer allows you an unrivaled degree of control in visually designing the screen and in inserting specific steps and information in key handheld processes like Picking and Receiving.

By leveraging the capabilities of Screen Designer you can:

- Edit the layout of the information on any screen – either globally or client specific
- Add or remove information, prompts, and pop-up screens – either globally or client specific
- Edit the font, color, size, style and add custom images that can be tied to system information (like product graphics) – either globally or client specific
- Add user defined screens to key workflows like Picking and Receiving that allow the warehouse worker to capture and validate key pieces of information
- Store the additional information in both active and historical Sales Orders and Purchase Orders

Screen Designer provides the capability that users have been looking for to streamline and customize the warehouse operations without the need for any custom programming.

### Call Us Today For More Details

AccellosOne Screen Designer can help you lower your costs, improve your customer service and drive operational efficiencies in your business. Isn't it time to start?
